SUMMARY

AI Engineer (M.S. CS, Boston University, Dec 2026); NVIDIA-Certified Professional: Agentic AI and Claude Certified Developer. Builds large language model (LLM) agents with retrieval-augmented generation (RAG) and evals: a 14-tool agent for enterprise client Sikich, a guardrailed Claude Code harness for a regulated client; open PRs to vLLM and LlamaIndex.

EXPERIENCE

Boston University, Questrom Computational Lab | Lead Backend Engineer | Aug 2026 - Present

- Architected the agentic SDLC harness that holds Claude Code agents to the same gates as human engineers in a regulated client codebase: least-privilege permissions, context-routing hooks, CodeRabbit review linked to Linear via MCP, shipped as a plugin.
- Led the Django REST Framework and PostgreSQL backend: data-layer RBAC, revocable JWT, audit logs, and an idempotent recurrence engine that turns the legacy system's silent missed jobs into dispatch alerts.
- Hardened delivery: CI fails on API-contract drift from the React frontend, a build-once Docker image promotes across Azure environments, and a re-runnable migration streams Blob records into PostgreSQL at constant memory.

Boston University, Questrom Computational Lab | AI Engineer (Graduate Researcher) | May 2026 - Present

- Architected a 14-tool LangGraph agent (Azure OpenAI GPT-4o, AI Search) for Sikich: document Q&A, comparison, drafting; ran the customer-facing requirements, demos and weekly knowledge transfer.
- Built hybrid retrieval (BM25 + vector, query rewriting, Cohere re-ranking) and LLM-as-a-judge evals for hallucination.
- Engineered PII and entity redaction guardrails plus header-aware chunking with SHA-256 dedup, so client data stays protected and each document indexes once.
- Shipped cited, streamed answers (FastAPI SSE) and a Cosmos DB knowledge graph; fixed a dedup race and a prod Docker fault.

IMG Systems Pvt. Ltd. | Software Engineering Intern | Remote | Aug 2024 - Apr 2025

- Engineered an Apache Tika parsing pipeline: +20% extraction accuracy on 5,000+ profiles a month, 15% less screening time.
- Lifted schema accuracy to 95% (from 75-78%) with Pydantic JSON Schema validation, cutting manual review 70%.
- Tuned candidate-to-role collaborative filtering: match accuracy +20%, false positives -18%.
- Containerized FastAPI microservices (PostgreSQL, Redis): API latency -25%, throughput +30%; CI/CD on GitHub Actions.

Growaza Pvt. Ltd. | Associate Software Engineer Intern | Remote | Jan 2024 - Jul 2024

- Cut API response time 30% with Redis caching and async handling; engagement +22% for 1,000+ daily users.
- Shipped a MySQL inventory dashboard for 2,000+ SKUs (98% accurate); secured REST APIs with JWT and RBAC on AWS.

PROJECTS

Open Source | github.com/Kushal9889 | Jul 2026 - Present

- Open PRs under review in vLLM (90k+ stars, #56846) and LlamaIndex (50k+ stars, #23053); reported MCP Python SDK (24k+ stars) issue #3490.
- Reported LangChain Deep Agents (29k+ stars) bug #4846 with a minimal reproduction; the fix, PR #4925, was written and merged by a LangChain maintainer 57 hours later, crediting my report.

Agentic Portfolio: kushal-portfolio-223.netlify.app | github.com/Kushal9889/kushal-portfolio-v2 | Aug 2026

- Precision@1 0.86, MRR 0.93, 1.16 s median latency: Next.js and TypeScript LangGraph agent answering recruiter questions over SSE from a grounded Postgres pgvector corpus.
- 16-case LLM eval suite run 5x gates every release (grounding, injection refusal, consistency); 4-provider failover incl. NVIDIA NIM.

SKILLS

Languages: Python, TypeScript, SQL
AI and LLM: LLM agents, Claude Code, RAG, LangGraph, LangChain, LLM-as-a-judge evals, hybrid search, re-ranking, tool calling, prompt engineering, guardrails, MCP (Model Context Protocol), LlamaIndex, NVIDIA NIM
Backend and Data: FastAPI, Django REST Framework, PostgreSQL, pgvector, Redis, Cosmos DB, MySQL, React, Next.js
Cloud and DevOps: Azure (OpenAI, AI Search, Blob), Amazon Web Services (AWS: EC2, S3), GCP, Docker, CI/CD

EDUCATION

Boston University | Master of Science in Computer Science | GPA 3.5/4.0 | Sep 2025 - Dec 2026
Graduate Teaching Assistant, MET CS 664 Artificial Intelligence (about 40 graduate students) | Sep 2026 - Present
IIITDM Jabalpur | Bachelor of Technology in Computer Science and Engineering | Oct 2020 - Jun 2024

CERTIFICATIONS

NVIDIA-Certified Professional: Agentic AI (NCP-AAI, 2026) | Claude Certified Developer - Foundations (Anthropic, 2026) | AWS Cloud Technical Essentials (2026) | Google Cloud Fundamentals (2025)
